SUMMARY

With 5 years' experience in developing and deploying websites, I bring a plethora of skills and knowledge to the table. I am someone who thoroughly enjoys tearing apart complex, confusing puzzles and engineering elegant solutions that meet the myriad of requirements for today's modern business.

I am a lifelong learner who is curious about all things related to web development, as evident by my work history. But more importantly, I can switch between detailed and big picture thinking effortlessly. This means I can meet the deadlines, prioritize between must haves and great to haves, communicate effectively with different departments and work extremely efficiently.
